\*\* First Responder on Scene

<b>Patient exam</b> locations of pain, tenderness & injuries, <u>C</u> irculation <u>S</u> ensation <u>M</u> otion
Primary survey - LOC established/breathing and airway management ok in position found. Only painful response initially,
Focused secondary - contusion on forehead, abrasions on back Complete head/toe reviled no additional injuries. PT was initially very disoriented, After A+Ox4 kept talking about a flying sleigh/Elves and a reindeer with a red light. MOI suggests possible head/neck/back injury.
<b>Signs &amp; Symptoms</b> Hoof mark on forehead/bleeding/scratches on back/ disoriented/ ETOH. No other apparent injuries.
<b>Allergies</b> Peanuts/ Fruitcake/ daughter-in-law
<b>Meds</b> R <sub>w</sub> , OTC, Rec. BP meds/ had not taken meds since yesterday PM
<b>Past Pertinent Med H<sub>x</sub></b> Nothing apparently pertinent. History of drinking at son's house and walking home alone.
<b>Last Oral Intake, Outputs</b> wine/turkey-full meal at 19:00. Wine and eggnog until about 23:15. (confirmed no peanuts or fruitcake)
<b>Events</b> leading to accident/illness Departed son's residence walking home in snow. Recalls leaving then seeing a fast-moving red light. Neighbor reported hearing a commotion and crash just over the river and near the woods.

**Assessment (problems)**

1 <i>Possible</i> Head/neck/back injury	<u>R</u> <u>Y</u> <u>G</u>
2 <i>Possible</i> Exposure to elements	<u>R</u> <u>Y</u> <u>G</u>
3 <i>Possible</i> Bleeding from forehead/abrasions on back (no noticeable bleeding on back during log-roll)	R <u>Y</u> G
4 <i>Possible</i> Remote location (Over the river and through the woods)	<u>R</u> <u>Y</u> <u>G</u>

**Airway      Breathing      Circulation (Chunk)      Disability      Environment**

**Plan for each problem and for getting help**

1 Initial in-line stabilization. In place at 23:47. (MC advised by radio)
2 Protect as possible in-place. Log-roll to blanket under PT (after confirmation from MC) Approved at 00:05
3 Control bleeding. Direct pressure on forehead as possible/clean/bandage. Irrigate/clean back and bandage as practical
4 Send member to designated county road mile marker to direct EMS to site.(just follow deer tracks)

**Monitor Interval** Every 5 minutes until A+Ox4 then at 15 minutes max. Assist EMS as directed on site. Positive MC established 23:55

<b>EVAC?</b> <u>Y</u> N	Date & Time 12/25 about 00:50	By: EMS Unit 13
<b>Care by:</b>		<b>Care by:</b>
<b>Care by:</b>		<b>Care by:</b>

Note: Crew searched the immediate area for additional victims... only found lots of reindeer poop (no reindeer), a green Elf's hat (no Elf) and sleigh tracks abruptly ending (no sleigh). Alerted the CAP to start a SAR for possible missing sleigh.
